EDUCATION

Pennsylvania State University

Bachelor of Science in Computer Science

University Park, PA

Expected May 2026

Relevant Coursework: Algorithms, Data Structures, Artificial Intelligence, Operating Systems, Distributed Systems, Database Management Systems, Object-Oriented Programming with Web Applications

SKILLS

Languages: Python, Swift, Kotlin, Java, C++, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: React, React Native, SwiftUI, Next.js, Flask, Django, Express, GraphQL, Redis

Tools & Platforms: AWS, Docker, Git, k6

EXPERIENCE

Pinterest

Software Engineer Intern - Core Engineering

Remote

May 2025 - August 2025

- Designed and shipped a discovery module on Home Feed, integrating user interest vectors and topic extraction services to enable serendipitous content exploration for millions of Pinners
- Improved reliability and data integrity of a core API serving 170M+ requests by adding strict request parameter validation, eliminating invalid requests in production and reducing 3,000+ malformed requests daily
- Designed and executed A/B experiments for Shopping Modules across 5 copy variants, collaborating with product/design teams and resolving statistical imbalances for experiments impacting millions of impressions

Warner Bros Discovery

Software Engineer Intern - Bleacher Report

Atlanta, GA

June 2024 - August 2024

- Designed and deployed a shared Redis-based caching solution for Bleacher Report's web application, enhancing server-side rendering performance and cutting storage needs by up to 90%
- Worked closely with DevOps, engineering teams, and key stakeholders to design and optimize the architecture of the Bleacher Report web application, leveraging technologies like Next.js, Apollo GraphQL, and Docker
- Contributed to the front-end development of Bleacher Report 2.0, integrating betting features using Next.js, TypeScript, and Storybook, and conducted performance testing with k6 to ensure application reliability

355Code

Computer Science Instructor

Remote

October 2022 - January 2024

- Tutored 20+ students in JavaScript and Python, providing instruction in front-end and back-end technologies
- Leveraged strong communication and teaching skills to simplify complex concepts for diverse learners

PROJECTS

Art Explorer App | *SwiftUI, Harvard Art Museums API, URLSession, AsyncImage, JSON Parsing, MapKit*

- Developed an iOS app using SwiftUI that allows users to explore artworks from the Harvard Art Museums API
- Enabled filtering by culture, artist, medium, and period with detailed views showing image, description, and geographical context
- Implemented search functionality and asynchronous image loading to enhance the user experience

Peer-to-Peer File Sharing | *Python, Socket Programming, Multi-threading, Hash Functions*

- Developed a P2P file-sharing system allowing multiple clients to share and download files simultaneously
- Implemented a central server to maintain shared file lists and distributions across peers
- Utilized multi-threading to handle concurrent downloads from different peers and integrated hash functions for file integrity

EXTRACURRICULAR ACTIVITIES

- Member of National Society of Black Engineers:** Engaged in networking events and career fairs, fostering connections with industry professionals and increasing opportunities for career advancement
- Member of ColorStack:** Participated in networking events, mentorship programs, and technical workshops to advance skills and career opportunities in tech
- CodePath Student:** Certified in iOS 101 and iOS 102 courses. Developed 'StoryTales', a collaborative storytelling app using Swift UIKit, Firebase, and AI
